

## **THE FIRST PILOT-CENTER OF ORAL REHABILITATION IN ROMANIA - THE WARRANT OF A COMPLETE MEDICAL APPROACH**

Today, February 28, 2011 is the moment the first pilot-center from Romania and the first network of oral rehabilitation is founded as part of the project “ Center of training specialists and resources of oral rehabilitation”, cofunded from the Social European Fund through the Regional Operational Project for Human Resource Development 2007-2013, Priority Axe 1 “Education and professional training in the view of economic growth and social development based on knowledge”, Major domain of intervention 1.3 “Human resource development in education and training”, Contract Identification Number: POSDRU/87/1.3/S/62208.

This center ensures curriculum balance and an approach to the concept of oral rehabilitation from a holistic-integrating perspective, the activities being interdisciplinary.

The center has high performance means of evaluation, diagnosis and treatment such as 3d navigation in oral implantology, facial arches and computerized axiography systems, as well as the necessary means for the therapy of temporo-mandibular articulation.

The telemedicine system will allow access to fast techniques of learning the newest oral rehabilitation methods.

The first stage is focused in trainer formation and the subsequent stage on specialists’ acquiring competences in this complex domain.

The patient is the main beneficiary who is to have access to specialized treatment in the field of oral rehabilitation.

For the first time there has been open communication between The Romanian Society of Oral Rehabilitation, The Romanian Medical Association and The Romanian Academy, teaching staff and practitioners, with the participation of the College of the Romanian Dentists, and the regional Colleges.

The pilot center will provide optimum conditions to acquire at the same time research-production-practical application ensuring individualized and high performance therapy.

The regulations and the protocol for this center have been elaborated during the round table preceding the official project presentation.

The project is climactic with respect to novelty and complexity, succeeding the two running projects cofunded from the European Social Fund and having the same coordination:.. “University medical education adjustment to the labour market and to the knowledge-based society” and “Strategies of practical training for rapid absorption by labour market of dental medicine students”
